Who we are:

Ips Plus Solutions Limited, a Pan African Information Technology and Engineering Company incorporated in Lagos Nigeria, is focused in development, Integration and Support of a wide range of Strategic and transformational IT Solution for the Public and Private Sector.

Because of our passion and commitment to create value and achieve advantage for our customers, Ips Plus Solutions is specialized in development and integration of cutting edge information technology solutions for System Integration and Enterprise Management, Near field communication and Mobile Payment, Identity, Software development and Computer programming, Security and Penetration testing, business Continuity Management and Information Systems Assurance.

With a strong belief in result and change oriented IT leadership, Ips Plus Solutions strives to foster long-term relationships with partner-clients to effectively develop unique solutions based on specific business and operational goals. Our model of engagement is deeply embedded in continuous partnership with customers towards

ensuring that their needs are well understood, and that suitable solutions are timely provided with zero defects.

Copyright: Ips Plus Solutions Limited

Our approach to addressing market demands and meeting customers' requirements and expectation is solidly behind our motto 'Mark of Excellence'

At Ips Plus Solutions , we strive to continuously find result oriented formula for the success of our esteemed customers. This is achieved by an extreme collaboration with our customers towards identification, scrutiny, correction, maintenance and management of mission-critical solution that ensures that our solution offering are tightly aligned with client's expectations and strategic goals. This approach guarantees that our clients will consistently benefit from our expert knowledge and skills.

Business Focus:

Our thinking is very unconventional and our people have strong pedigree and proven track record in several IT areas including:

IT Security and Penetration testing.

- Software development and Customization.
- E-Payment Solution covering Near Field Communication, Point of Sale and Mobile Money Consulting.

Business Continuity Management.

- System Integration and computer programming.
- Strategy Development, Organizational Transformation, and Business Ethics.

Business Drivers:

The African continent is saddled with a myriad of technology and infrastructural challenges. More still, research has shown that while there is an endless pressure to secure and implement new systems, little or no attention is paid to the extent of value derived from these systems. For this reason,

Ips Plus Solutions is passionate and committed to delivering value and meaning to Information Technology Strategic Projects.

Vision:

To champion digital transformation in Africa and create an organization that accords respect and honor to all its stakeholders.

To bring trust, responsibility and human face to all that we do; respectfully keep our commitments to all customers and make their IT and business needs our priority; to foster a collaborative relationship and environment where employees can learn, advance, love and leave legacies.

Mission:

To demonstrate by example at all times, that customers' satisfaction is our core business by taking further steps towards exceeding their expectation through adaptive strategies coined with a sole purpose of meeting customers' needs.

Our People:

Our people are our most valuable assets and without them we can hardly achieve. Ips Plus Solutions operates with a very high standard and strives to adhere to these standards, rules, and ethics that revolve around our business principles and some key personnel are:

1. Our staff are Principal Consultancy we are highly experienced IT professionals and holds a Masters Degree in Information Technology (Software Systems) from Heriot Watt University, Edinburgh and has advanced his academic career with certifications in information Systems, Information Security Management, Project Management and organization leadership. SERVICES:

Consulting and Business Advisory

Ips Plus Solutions Limited offers a wide range of unparalleled systems analytics and consulting services. At all times, our solution is geared towards meeting the specific needs of our clients. Our in-depth knowledge of organizational success and the alignment between Information technology and Businesses have given us an advantage in guiding our partner organizations through so many IT related areas including Software Acquisition & Development, and Management Support Services/training in Near field communication, security, networking, system and penetration testing.

Software Acquisition and Development: Many organizations are victims of poorly selected and developed software. Unfortunately, corporate organizations have slim chances of recovering from major strategic failures particularly when it has to do with medium to long

term investments and decisions. Our services in software acquisition and development include a full range of:

- Program Planning and concept development;
- Software design and Development;
- Implementation, Configuration and Integration services;
- Requirements definition and analysis;
- Program Coding, testing; production;
- Deployment; implementation and integration • Training of staffs for internal support services.

Management Support Services: Value delivery and optimization have always been a challenge to many organizations embarking on systems integration and automation projects. Even as lessons ought to have been learnt by many organizations that have lost millions of dollars on projects that are either well conceived but wrongly implemented or wrongly

conceived and implemented, the question still remains: why do organizations fail to realize value from their investments in Information Technology. Ips Plus Solutions is equipped with highly experienced consultants with leading industry expertise in management support services which includes a full range of business and technical management services impacting all areas of IT policy and strategies, Service Oriented Architecture, System security; training and skills development; enterprise resource management; business process reengineering; IT transformation; organizational change leadership; and enterprise and program management office support. In all cases, metrics for determining effectiveness and impact of our management support services are usually set at inception of projects and these metrics are stored at agreed intervals

Industries:

- Public Sector, Private Sector, Financial Sector
- E-Payment and Mobile Payment
- Business Continuity Management and Planning
- Consulting Services and organizational Transformation

SOLUTIONS:

1. Near Field Communication Management

Ips Plus Solutions Limited Brief Overview

IPS PLUS SOLUTIONS has been operating in the Nigerian market since 2002. IPS provides complex solutions enabling deployment of an efficient, timeless and high-quality communication environment. More than 100 realized installations and deliveries proves we are competent to design optimal solutions customized for customers from various sectors such as public institutions, banks, hospitals and retail chains.

We belong to one of the leading communication systems integrator and data & telecommunication services provider in the domestic market.

Thanks to the qualified personnel IPS belongs to the best in its market segment. We and our partners are extremely successful, especially in the deployment of the most advanced network-communication technology.

IPS is one of few IT companies in Nigeria, which employ best-of-breed certified specialists and consultants. This represents the highest possible level of certification of individuals awarded by Cisco, Redhat Linux, Microsoft technologies.

In its further technical development, IPS seeks partners able to offer solutions meeting operational requirements and open to future needs. IPS is prepared to offer its entire knowledge potential in the field of design, delivery and administration of network and security infrastructure as well as in the field of the modern communication services.

The strategic partners of IPS are companies like Network Instruments, Hewlett-Packard, Microsoft, Kaspersky Labs, E-scan Antivirus, Symantec, Secure point, VERITAS, MacAfee, GFI, Redhat, and Microsoft.

Among the prestigious technical certificates of the personnel there are:
